Kod producenta	FMEGRRPS

Opis produktu

This pipe allows the removal of the Exhaust Gas Recirculation valve on the 1999-2005 VAG (transverse) 1.9 PD diesel engine with the following codes: ALH (90bhp), ATD (100bhp), AHF (110bhp), ASV (110bhp), AJM (115bhp) and AUY (115bhp). Incorporated onto the replacement pipe is a secured blanking plate and a boost gauge connection, which can be blanked off if not needed with a short length of pipe (supplied).

Please note: All parts necessary for installation are included, however it is necessary to re-use the existing valve "O" ring seal with this pipe.
