Opis produktu

With the release of the VW Atlas line up from Volkswagen comes the desire to raise the vehicle for more ground clearance. Forge Motorsport has taken several vehicles through the testing process to determine the maximum lift while still giving the vehicle a factory ride. We worked closely with SMITH VW to make this possible. Limited to the amount of room that the factory axle will move this kit provides a 1.50" total lift while leveling the front of the vehicle with the rear.Â

Features:

- Easy bolt-on installation
- Maintains factory ride quality
- Increased ground clearance
- Levels the front with the rear of the vehicle
- No need to disassemble your struts to install
- Kit contains 4 spacers (2 Front and 2 Rear) as well as mounting hardware for the front Strut-Spacer. Rear kit will reuse existing bushing insert.
