### Opis produktu

The VW Touareg is a remarkable machine. Whether you own one in Diesel Form or Petrol the desire to take it off the paved road to the great outdoors creates some challenges. One of which is more ground clearance. Our Development Teams have worked with the engineers at Powerflex to create a perfect solution to this problem. Utilizing their PU product together we have created a lift spacer that will handle anything you can throw at it.

#### FEATURES

Bolt-on installation

Maintains factory ride quality

Increased ground clearance

Lifts the vehicle 2.0"

Front and Rear Struts must be disassembled.

Kit contains 4 spacers (2 Front and 2 Rear) as well as mounting hardware for the front Strut-Spacer.

#### **Fitment:**

***Touareg 2011-2017***

***Porsche Cayenne 2010-2018***

We suggest for a professional to install your lift kit however if you would like guidance on attempting it yourself here is a walk through that one of our customers did:
