Opis produktu

4AGE 20V Naturally Aspirated Camshaft. Designed for professionally built high rpm 4A-GE 20V race engine with high compression, ported cylinder head and well designed intake and exhaust system. Great with 7A based rotating assembly and stroker kits. More top end power than the 194-D camshaft, pulling to approx 10k+ RPM depending on engine. Recommends VVT delete on intake, using adjustable gears for fixed timing. Kelford Cams recommends KV551-B valve spring. \n \n \n View all 4A-GE 20V Engine Camshafts & Valve Train Parts \n \n \n \n
