Zawór blow off BOV Turbosmart Pro Port GenV

Cena brutto	2 196,50 zł
Cena netto	1 785,77 zł
Dostępność	Na zamówienie
Numer katalogowy	331431515
Kod producenta	TS-0208-1111

Opis produktu

ProPort by Turbosmart is an All New 54mm (2.13in) Blow Off Valve with a tiny footprint and massive flow. The ProPort flows 420 cfm which is enough for 3500 HP and is in a league of its own standing 30mm (1.2in) lower than PowerPort while flowing over 25% more than the Market leading 50mm Raceport. Features include our unique locking collar design, new unique vent profile, sensor cap option and spring options for all turbocharged and supercharged applications. The ProPort was a result of over 25 years of Blow Off Valve manufacturing experience and 12 months of internal development. The design is CFD driven & real-world validated for maximum possible flow based on the demands of the Tuning & Motorsport Market. The Milspec Diaphragm operated valve is highly responsive while using our Boost-Balance system which means the more boost you feed it, the better it seals! Available with an onboard position sensor as an option, we utilize a non-contact hall effect sensor for position of the valve which means no through-holes in the cap ensuring no chance of leaks. The data this can provide for professional & amateur teams alike is invaluable when every pass & every minute on track counts! The Quick Release V-Band system is of the quality you have come to expect from Turbosmart as our GenV cap profile is easily distinguishable and includes 2 x 1/8NPT reference ports on a cap that can be rotated for simplifying reference hose runs in complex engine bays. Available in: Limited Edition Platinum TS-0208-1116 Blue TS-0208-1111 Black TS-0208-1112 Red TS-0208-1113 Purple TS-0208-1114 Sleeper TS-0208-1115 Black with Sensor Cap Installed TS-0208-1212 Sensor Cap Upgrade Black TS-0208-9002
