Zawór blow off BOV Turbosmart TS-0203-1031 Kompact Dual Port Hyundai Veloster

Cena brutto	1 108,00 zł
Cena netto	900,81 zł
Cena poprzednia	1 139,52 zł
Dostępność	Na zamówienie
Numer katalogowy	331431288
Kod producenta	TS-0203-1031

Opis produktu

Turbosmart's Kompact VR02 BOV was designed specifically to fit the Hyundai Veloster Turbo. The Veloster's factory bypass valve is a plastic unit that becomes brittle and wears out over time. It can also be forced open at high boost levels – especially if boost levels are increased over standard. The Kompact VR02 features a unique design to fit in the tight mounting location of the Veloster's factory bypass valve. The result is a product that is truly a direct replacement for the OEM valve, requiring no cutting or special tools for a 100% reversible installation. Machined from billet aluminium, the VR02 cannot be overcome by boost, and it won't break like the standard plastic item. The Dual Port provides head-turning sound when the driver lets off the throttle, while still routing an amount of air back into the intake, like the standard valve. The Kompact VR02 Dual Port is modular in its design, meaning it is easily adapted from the standard 50-50 setup to either a full recirculating or full vent-to-atmosphere valve, based on the driver's preference. Simply unscrew the unwanted fitting and replace it with the included blanking plug.
