Kod producenta	TS-0203-1066

Opis produktu

Turbosmart's Kompact Dual Port for the 1.0-litre EcoBoost is a billet aluminium replacement for Fiesta's factory plastic BOV. The Dual Port is a 50-50 recirculation/vent-to-atmosphere valve for that classic vent-to-atmosphere BOV sound at high boost and quiet operation at low boost. The standard bypass valve on the 1.0-litre EcoBoost engines is a weak, plastic, diaphragm-type valve with a track record of failures. Turbosmart's billet aluminium replacement is manufactured with precision, designed for unlimited boost holding capability, excellent response times and heavy-duty reliability. Installation is straightforward, and the valve is a direct bolt-on replacement for the factory valve. No special tools are required, and all necessary hardware is included. The Kompact is precision machined, hand-assembled, and individually tested in Australia to the highest quality standards.
