Opis produktu

BC3041 - Honda/Acura K20A2/K20A/K20Z3 Exhaust Valves (30mm/STD) - set/8 BC valves are one piece design with a friction welded Stellite tip for the best possible performance. Every valve is made from premium grade, heat resistant stainless steel material to insure reliability with high boost and/or high rpm applications. The undercut stem above the head area not only reduces overall weight for extended rpm potential, but also significantly improves air/fuel flow in and out of the combustion chamber. Every valve is fully machined and features a swirl polished finish under the head. Head Dia 30mm Stem Dia 5.45mm Overall Length 108.65mm Material Stainless Valve Type Exhaust / Dished
