Cena brutto	1 680,00 zł
Cena netto	1 365,85 zł
Numer katalogowy	FO-FMINDP14.N

Opis produktu

A complete induction kit for the VW Polo 1.4 GTI. Fitment of this kit will unleash the power that is being restricted by the OEM air box, improving the breathing of your engine. Unlike many aftermarket induction kits, this kit maintains the intake of Cold air to ensure that performance gains achieved through using a free flowing filter are not lost by drawing in warmer air from the engine bay. Users of this kit have reported back on the ease of installation and a sportier sound without being obtrusive. The benefit of installing this kit is even greater on mapped vehicles, when the OEM filtration system becomes a limiting factor to performance gains. **DO NOT OVER TIGHTEN** When fitting the filter to its counterpart please ensure you do not over tighten the hose clamp connecting them. Doing so could result in the part being crushed, leading to fitment and/or performance issues. The recommended torque setting for this hose clamp is 2-2.4Nm Color: czarny
