Opis produktu

FMIC.EU - Silicone Intake Hose Kit for Audi TT (8J) 2.0 TFSI The intake system silicone hose kit for Audi TT (8J) 2.0 TFSI consists of 5 high-quality silicone connectors, precisely molded to replicate the original piping. This ensures perfect fitment, easy installation, and trouble-free operation. Premium Quality Construction: Manufactured from multi-layer reinforced silicone, resistant to high pressures and elevated temperatures in the intake system. Strong yet flexible structure provides a much longer service life compared to OEM hoses, which often harden, crack, or lose elasticity. Designed for both durability and performance in demanding conditions. Why Choose FMIC.EU? Europe's widest selection of silicone connectors in various sizes, types, and colors. Perfect for upgrading or building a professional intake or cooling system. Trusted by specialized tuning workshops and performance car enthusiasts worldwide.
