Kod EAN	9337467171402

Opis produktu

The Xtreme Clutch 270mm twin plate organic clutch range has been designed specifically for high horsepower street use. The kits are designed to offer excellent drivability in high horsepower vehicles and are well suited to high powered supercharged and turbocharged V8 engines. With a heavy duty pressure plate, rigid organic friction discs and a strap-driven intermediate plate, these kits offer excellent drivability whilst providing a significant increase in torque capacity. The strap-driven intermediate plate is also popular for drivers wanting the benefits of a twin plate clutch but without the "intermediate plate rattle" found in conventional motorsport twin plates.
